Tips for a quick detox program:

14 days of training for excellent health with the D A R program.

D - dilution, detoxification, disinfection

A - alkalinization

R - reconstruction

We will apply first steps, dilution / detoxification / alkalization, without disinfection and reconstruction.

In the long run we can think about applying the complete program: see the Detox module.

DILUTION / DETOX / ALCALYZE

Start the day with a large glass of alkaline water, gradually increase to 3 glasses, consumed within 30-40 minutes. Drink water on an empty stomach, breakfast can be served 30-40 minutes after the last glass.

We give up sugar, sweets and reduce the consumption of coffee and alcoholic beverages. (for those who can not give up completely, a cup of coffee / day and a glass of wine are allowed. In these conditions the natural supplements that help the alkalization process are absolutely necessary: Mg, K, Chlorophyll, wheat grass-wheat grass, green barley grass, algae, Oxymax, Low Deuterium OxyCrystal, etc.).

Epson salt baths - detoxification and restoration of the electromagnetic field.

Massage, lymphatic drainage.

Exercise and sleep 7-8 hours.

3 days / week of food restriction. During this period you can eat fruits, dried fruits (cranberries, apricots, raisins, gooseberries - not in large quantities, because they contain sugar, but the body needs carbohydrates as a source of energy), salads, smoothies, teas and of course water . You can add brown rice, buckwheat, millet.

Biofeedback sessions once a week.

Health and Good Luck!
